

Replacing the 12 volt fan unit in the Villa 9011.

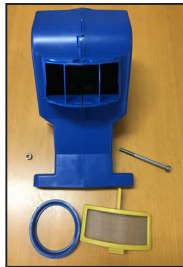

- Remove 12 volt plug from the side.
- Loosen the 2 black screws shown above and remove the fan housing.

- Remove the 2 screws - one in either side of the casing.

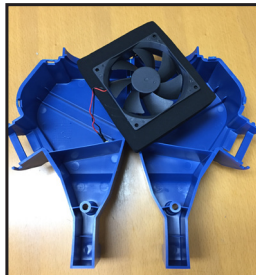

- Remove the rubber seal and insect screen.

- Using careful pressure, lever the two halves apart, to reveal the fan.

- Lift fan out of the retaining groove and disconnect.

- Reinstall new fan unit following these instructions in reverse.
