

A better way to go!

You are about to reduce your impact on the environment by using the **Airhead Dry Composting Toilet.**

Use the Airhead toilet with the **trap closed**. Liquids and solids are automatically separated.

To make a **'liquid'** donation:
Close Trap. Men can stand and women can sit.
If the urine bottle is full, ask for assistance.

To make a **'solids'** donation:

1. **Close Trap.** Place a bowl liner in the bowl.
2. When finished, flip the black lever on the side to **open** the trap and gravity will send it on its way, toilet paper and all. Mist bowl with G2Go, to keep the bowl clean and smelling sweet.
3. **Close the trap** and the lid.
4. **Turn** the crank handle once or twice to disperse the contents.

Congratulations!

You have just successfully used the Airhead Dry Composting Toilet and reduced your impact on the environment.

IMPORTANT: IF YOU DIDN'T EAT IT, DON'T PUT IT IN THE AIRHEAD!

Sanitary products should be disposed of separately.
